

# ARE YOUR MICROSOFT INVESTMENTS PROTECTED?

Intelligent  
traffic management  
products from F5 Networks  
ensure they are.

You invested a great deal in your Microsoft infrastructure, but without products from F5, you're not maximizing what you paid for. F5 is the critical component you need to make your Microsoft investment soar.

F5, more than any other network vendor, gives your Microsoft investment more muscle, adding increased scalability, security, and automation to your Microsoft applications. This helps ensure your applications are highly available, performing well, and secure – from anywhere, and from any device.

F5's award-winning products like BIG-IP® are uniquely qualified to strengthen Microsoft technologies – including Windows Server 2003 – enabling technologies to interact with programmatic automation and built-in security.

Start maximizing your Microsoft investment and learn more about how F5 toughens Microsoft technologies by visiting [www.f5.com/bigipmec](http://www.f5.com/bigipmec) or call [866-543-9370](tel:866-543-9370).
