

# ARE YOUR ORACLE INVESTMENTS PROTECTED?

Intelligent  
traffic management  
products from F5 Networks  
ensure they are.

You invested a great deal in your Oracle applications, but without products from F5, your investment can run wild.

F5 protects your Oracle applications by eliminating single points of failure and ensuring ideal allocation of your network resources. This means your applications are high-powered, secure, and available – from anywhere, and from any device.

F5's award-winning products like BIG-IP® are uniquely qualified to integrate with your Oracle applications – including Oracle 10g products – to better secure the health of your network and improve the security, scalability, and automation of your systems.

Start maximizing your Oracle investment. Learn why F5 is an integral part in the successful delivery of Oracle applications by visiting [www.f5.com/bigipop](http://www.f5.com/bigipop) or call **866.543-9369**.
