LAB TIME IS PRECIOUS

That's why meaningful pre-lab preparation is crucial to the successful chemistry and biology lab learning experience.

With REACTOR Prep Labs from Late Nite Labs, students perform and analyze advanced hands-on simulations that are easy and enjoyable to use, and then enter the wet lab prepared, confident and ready to work.

With REACTOR Prep Labs:

IT'S ALL ABOUT UTILIZING TECHNOLOGY
TO GAIN AN EDGE IN SCIENCE EDUCATION.

"My students come to lab unprepared."

Students understand lab concepts and expectations before coming to the lab.

"My students don't read the lab manual."

Students are accountable for pre-lab work, and can prepare for the lab in a fun, efficient way.

"My students are easily distracted in the lab."

Students are prepared and confident, so they are less likely to lose attention.

"Education costs are skyrocketing."

Schools save money on lab materials and decrease wear and tear on expensive lab investments.

"I can't help every student at once."

Lab logs help teachers pinpoint where students need help.

"Grading takes a lot of my time."

Automatic grading and feedback tools let teachers refocus attention on teaching.

"I worry that students do not sufficiently understand lab safety guidelines."

Teachers know that students have completed prep lab assignments, which stress lab safety and MSDS guidelines.

"We need to keep our science program competitive."

State-of-the-art tools set your science program apart and help attract top students and teachers.

EASY IMPLEMENTATION

- Set-up is quick and easy. Browser-based software means there are NO installation headaches.
- Implementation specialists available to customize REACTOR Prep Labs to the specifications of your lab manual and course management system.

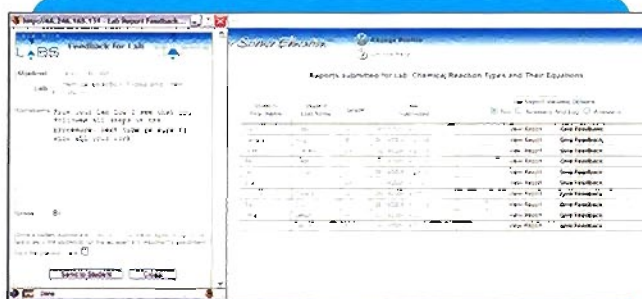

- Automatic data recording and graphing features enable students to conduct sophisticated analysis of quantitative data

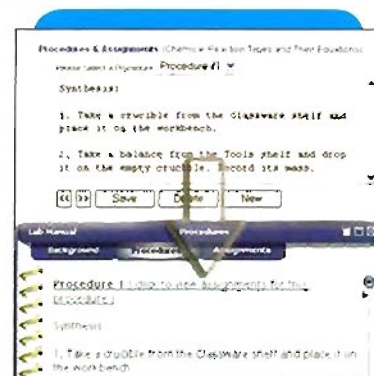

- REACTOR Prep Lab working environment

REACTOR PREP LAB HIGHLIGHTS

- Grades and student assignments are managed directly within REACTOR's interfaces for teachers and TAs

- Prep labs can be created in minutes, either from scratch or by customizing labs from our extensive library of ready-to-use prep labs

See why top schools choose REACTOR Prep Labs...

"The design of the program and the ability to check student work complements actual wet labs. This is a state-of-the-art development in science education."

Dr. Victor Batista, Yale University

"After using REACTOR Prep Labs for over a semester, my TAs and I are convinced that students have a better knowledge of the material when they come to the wet lab."

John Wiginton, Professor, University of Mississippi

"Registration was painless! Thanks for making this very easy for us!"

Debe Bell, Lab Coordinator,
Metro State College of Denver

"Late Nite Labs has created the best chemistry lab simulation around."

Professor George Bodner, Purdue University

"I especially like the safety information for each experiment."

Aaron R. Hutchison, Assistant Professor of Chemistry,
Cedarville University

"The program makes it necessary for us to have a complete grasp of what we are doing. I personally have a better understanding of what many of the labs are all about."

Student, University of Mississippi

"In doing these pre-labs, I learned the process and the actual point of the experiment. In my opinion, this more thoroughly prepares us for the pre-lab quizzes and for the lab experiment itself."

Student, University of Mississippi
